### **DETAILED ACTION**

Claims 1-3, 8 and 15-18 are under consideration in this application.

Claims 4-7 and 9-14 are held withdrawn from consideration as being drawn to nonelected subject matter 37 CFR 1.142(b).

#### ***Election/Restrictions***

The requirement is still deemed proper and is therefore made FINAL

Claims 4-7 and 9-14 require the present of an additional active ingredient and hence, differ in scope from the elected products.

This application contains claims 4-7 and 9-14 drawn to an invention nonelected with traverse in the reply filed on June 9, 2006. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

#### ***Claim Rejections - 35 USC § 102***

The rejection under 35 USC 102 is hereby withdrawn in view of applicants' amendments to the claims.

#### ***Claim Rejections - 35 USC § 103***

The rejection under 35 USC 103 is hereby withdrawn in view of applicants' statement that the prior art references and the present application were commonly owned at the time the invention was made.

#### ***Claim Rejections - 35 USC § 112***

The rejection under 35 USC 112 is hereby withdrawn in view of applicants' assertions that only arthropods, gastropods and nematodes are intended.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 8 and 16 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5 and 17 of copending Application No. 10/483,115. Although the conflicting claims are not identical, they are not patentably distinct from each other for the reasons set forth in the previous Office action.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Applicants assert that '115 claims a method of controlling particular insect pests. This is not persuasive at the instant claims are drawn to a method of controlling all invertebrate pests.

Claims 8 and 16 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5 and 24 of copending Application

Art Unit: 1625

No. 10/485,125. Although the conflicting claims are not identical, they are not patentably distinct from each other for the reasons set forth in the previous Office action.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Contra to applicants' arguments in the instant response, the instant claims are drawn to the treatment of all invertebrate pests.

***Allowable Subject Matter***

Claims 1-3, 15 and 18 are allowed.

Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Claims 8 and 16 are not allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1625

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
